eCare Technology Labs announces launch of it's next generation platform "eCare TravelSuite" for travel & Hospitality Industry.

eCare Technology Labs, part of eCare India Group, forayed into technology solutions for hospitality industry by announcing the launch of next generation booking engine solution for Small and mid size travel agencies, tour operators and travel management companies. The solutions offers an end to end solution to serve all needs of business and delivers the next generation technology for travel commerce.

eCare TravelSuite empowers travel management companies with the ability to automate existing labor-intensive processes, decrease the cost of travel, leverage additional negotiation opportunities and potentially add new revenue sources. http://ecaretechlabs.com/products_main.htm

eCare TravelSuite is packed with

- Full featured **Internet Booking engines** for Air (Flight booking), with Integrated Insurance & payment gateway
- **Customer Relation Management tool** (to manage all post booking requests effectively which yields more returned customers)
- **Administration module** - Helps travel agency to manage pre/post booking operations like define markups/discounts, generation and management of promotional campaigns, Affiliate management, Custom reports, PNR cancellations/updates, GDS synchronization etc.

eCare TravelSuite is an Java & XML product suite for travel commerce. It fully leverages the capabilities of the latest Java, XML and Web Services technologies and is based on N-Tier architecture to enable flexibility & maintainability for a long term. Its Integration layer is based on adopter model, which facilitates plug & play integration with third-party suppliers and results low cost development & deployment.

eCare TravelSuite's architecture is highly scalable and fault tolerant and can be deployed on Windows or Linux.

About eCare Technology Labs:

eCare Technology Labs is an offshore Outsourced Product Development & Services company, committed to deliver cost effective solutions to customers with expertise in outsourced product development and custom enterprise application development services through global delivery model.

eCare TravelSuite is a specialized product serving the need of small and medium level players in Travel & hospitality industry. Ecare plans to add more and more pluggable modules to the solution making it a highly flexible and customizable solution.
