

ecare Technology Labs, Offers Travel Portal Development services for Travel Agencies, Tour Operators and Travel Solution Providers

Chennai, India, Oct 11, 2010 - ecare Technology Labs, an offshore outsourced product development firm, offers Travel Portal Development services for travel agencies, tour operators and travel solution providers.

ecare Technology Labs develops exclusive travel portals that has the power of transforming the visitors to repeat customers. With the increasing number of people seeking online travel portals to plan and book their travel, ecare develops effective travel portals that help clients in showcasing & marketing their products to travelers, building their customer base, establishing proper communication channel , managing relationships and creating an effective online presence.

As per the requirements, ecare integrates client's travel portal with tools such as weather widget, Google maps and various information sources providing the latest travel news, trip advice and travel guides which will help travelers in planning their trip accordingly, while making the portal more attractive and informative to customers.

ecare provides internet booking engine integration services that will allow travelers to book their tickets online for flights, hotel and cars. Travel agencies and tour operators can avail this facility in order to generate more sales and retain their customers. [Travel Portal Development](#) service provided by ecare is cost-effective and would help travel agencies & tour operators in gaining competitive edge over other companies.

ecare Technology Labs offers complete travel technology solutions that also includes payment gateway integration, travel insurance, content management system, and search engine optimization.

About ecare Internet Booking engine (ecareIBE):

ecare Travel Suite is a specialized product serving the needs of small and medium level players in Travel & hospitality industry, backed by ecare IBE, a total reservations and marketing management solution in one. ecare's complete reservation software solution, ecare IBE, is a gds neutral booking engine pre-integrated with multiple global Distribution Systems (GDS), Low Cost Carrier (LCC) Airlines, Hotel Suppliers, Car Inventory suppliers, third party consolidator systems (with web services).

ecare plans to add more and more pluggable modules to the solution making it a highly flexible and customizable solution.

About ecare Technology Labs:
